

iSOFT appoints Lumetra to distribute AIMS solution in US market

Sydney – Monday, 2 March 2010 – iSOFT Group Limited, one of the world's largest healthcare information technology companies, announced a strategic partnership with Lumetra PSO, a US Government-backed Patient Safety Organization (PSO). Lumetra agreed to provide iSOFT's AIMS incident management software to US healthcare organizations that are seeking to reduce the complexity and cost of their patient safety and risk management programs.

Under the agreement, iSOFT appointed Lumetra PSO, a unit of San Francisco-based healthcare consultancy Lumetra Healthcare Solutions, to market, support and distribute AIMS in the United States. PSOs provide consulting services to US healthcare organizations that are seeking to minimize the safety risks of delivering care. Information used by PSOs has been afforded protection by the US Government as healthcare providers seek to better understand and prevent medical errors.

"The PSO market in the US is at an exciting and critical point as healthcare providers seek to partner with PSOs that can help them to understand and address patient safety problems," said Gary Cohen, iSOFT Executive Chairman & CEO. "The AIMS application is one of iSOFT's key offerings in the important US market. It is proven across organizations such as NSW Health, serving a population of nearly 7 million people in Australia."

AIMS incident management software provides an integrated electronic solution for collecting, tracking, reporting, and managing patient safety activity. The software captures adverse event and near miss information across acute care, community care, disability care, mental health, and residential aged care. Used by more than 400 Australian hospitals, as well as at sites in South Africa, New Zealand, and the United States, AIMS includes a standardized classification (taxonomy) that is recognized by the World Health Organization and the US Institute of Medicine.

Michael Dahlweid, iSOFT's Chief Medical Officer, said: "AIMS is web-based, secure, sophisticated, easy-to-use, and highly efficient. It uses the latest knowledge engineering methods to construct a high performance classification system. Its automated 'alert' and workflow functionality assures healthcare managers are notified about serious events, while providing follow-up notices to staff. Built-in Business Intelligence enables analysts extract meaningful information from a myriad of data points."

About iSOFT Group

iSOFT Group Limited (ASX: ISF) is the largest health information technology company listed on the Australian Securities Exchange, and among the world's biggest providers of advanced application solutions in modern healthcare economies.

iSOFT works with healthcare professionals to design and build software applications that answer all of the difficult questions posed by today's healthcare delivery challenges. Our solutions act as a catalyst for change, supporting free exchange of critical information across diverse care settings and participating organizations.

Today, more than 13,000 provider organizations in about 40 countries use iSOFT's solutions to manage patient information and drive improvements in their core processes. The group's sustainable development is delivered through careful planning, in-depth analysis of the market, and anticipation of our clients' evolving requirements. Our business is driven by the collective talent, experience and commitment of more than 4,700 specialists, including more than 2,700 technology and development professionals.

A global network of iSOFT subsidiaries, supported by an extensive partner network, provides substantial experience of national healthcare markets. As a result, we offer our clients comprehensive knowledge of local market requirements in terms of culture, language, working practices, regulation and organizational structure.

About Lumetra PSO

The Lumetra PSO (LPSO) is a component PSO and an independent division of Lumetra Healthcare Solutions, a nonprofit healthcare consulting organization that solves healthcare business problems with an integrated clinical, analytical, and technological solution. LPSO is officially designated by the US Department of Health and Human Services (HHS) as a federal Patient Safety Organization (PSO) under the Patient Safety and Quality Improvement Act of 2005 (PSQIO). The PSQIO is administered by the Agency for Healthcare Research and Quality (AHRQ). The Lumetra PSO, an independent division of Lumetra, works with providers nationwide to reduce the incidence of events that adversely affect patients.
